THE REAL PROBLEM

When documents become obstacles.

- 01 **More than 30% of project time is wasted just looking for digital or paper documents.**
- 02 **Over 20% of project time is lost on structuring and indexing digital or physical documents.**
- 03 **More than 10% of project time is wasted reformatting documents – digital or paper – just to make them citable.**

When you're exhausted and frustrated because most of your work has gone into basic tasks – not into your thinking and expertise. And you're not even sure you haven't missed something in the documents you've analyzed...

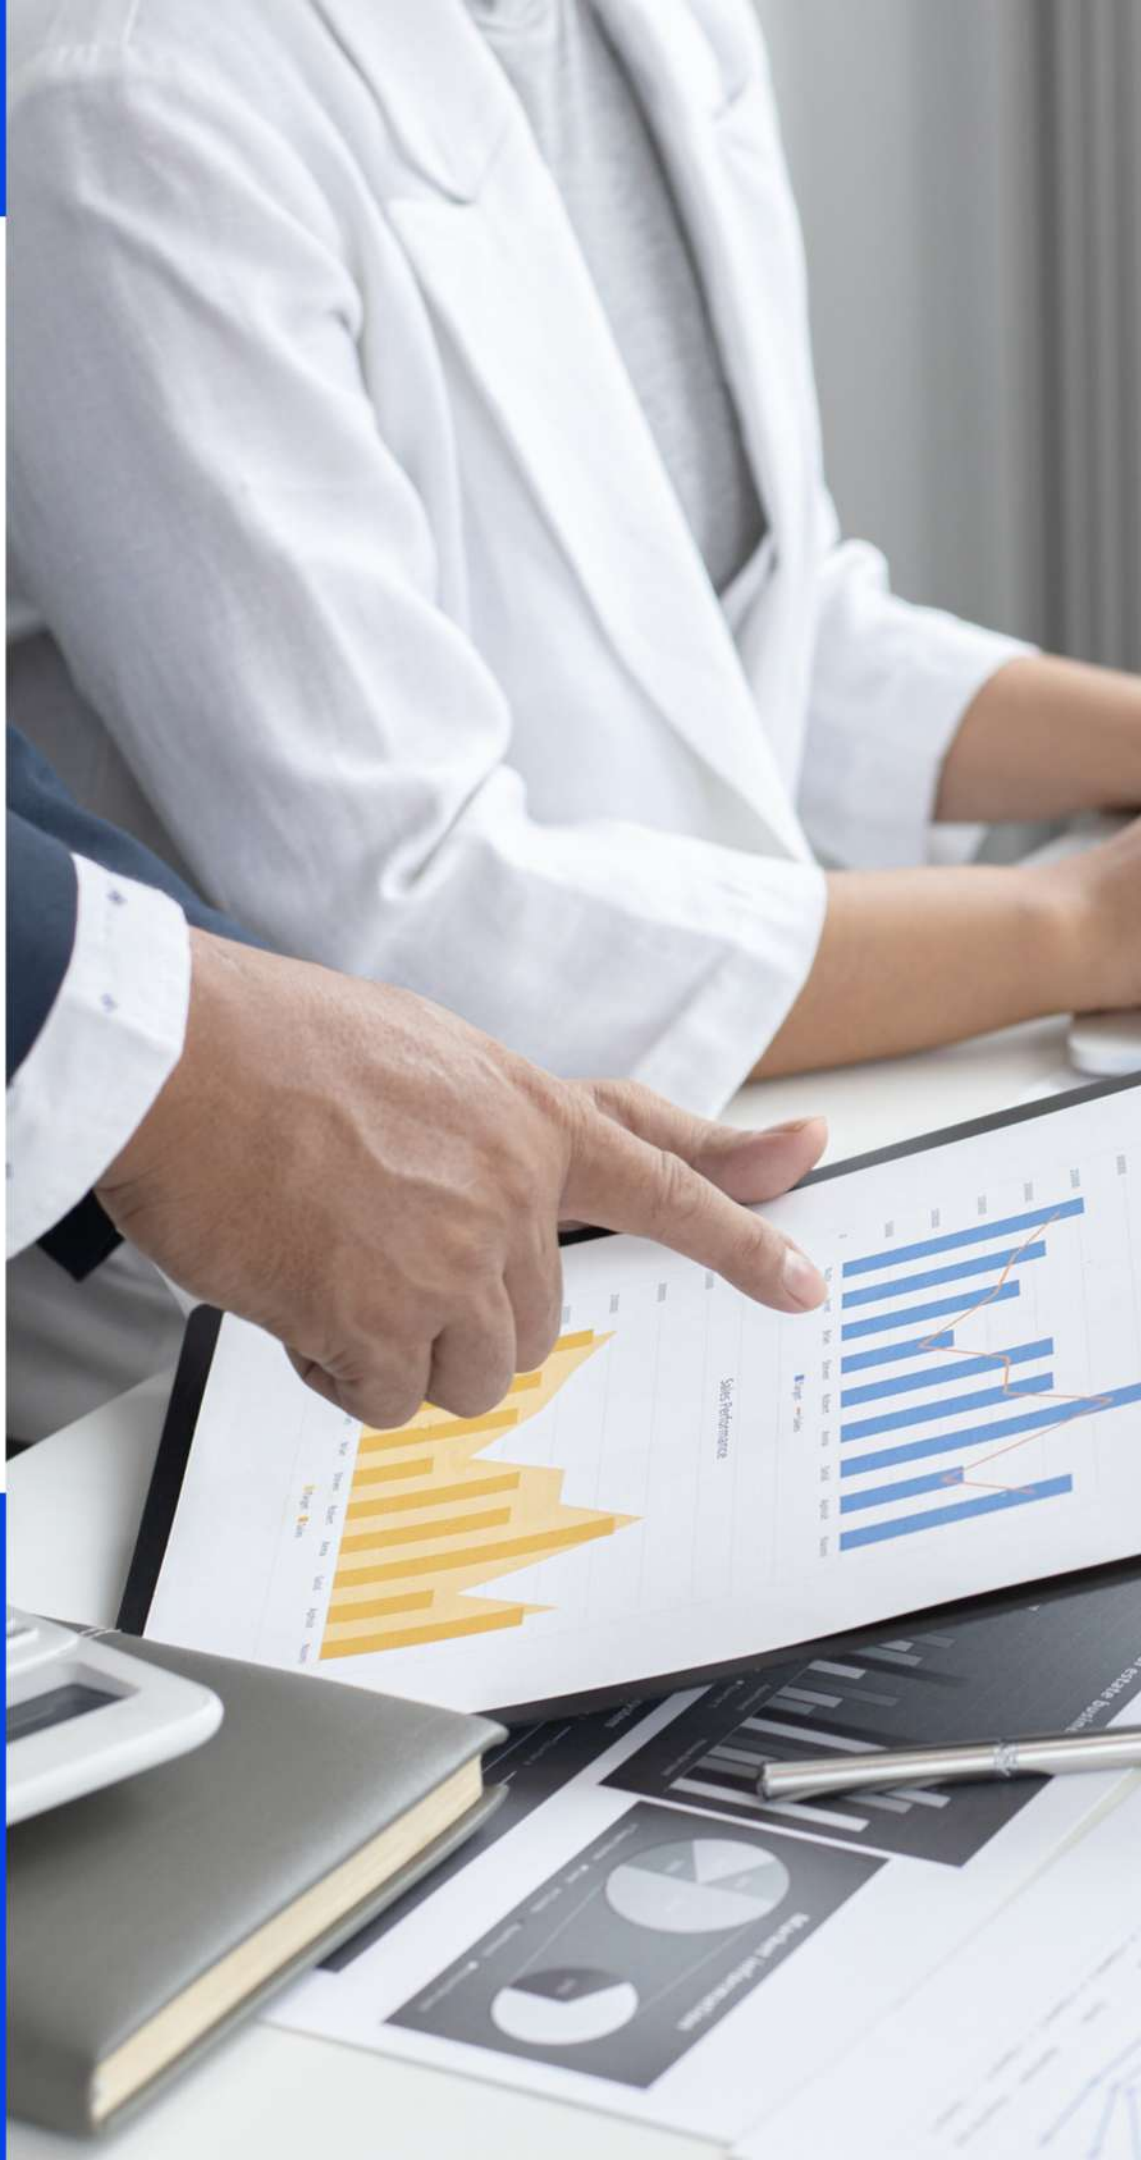

**MANUAL DATA ANALYSIS
IS A RISK – LEGALLY AND
FINANCIALLY.**

OUR PERSONAL STORY

“We’ve lost a case in court because a document wasn’t found in time — the client didn’t even remember it existed.”

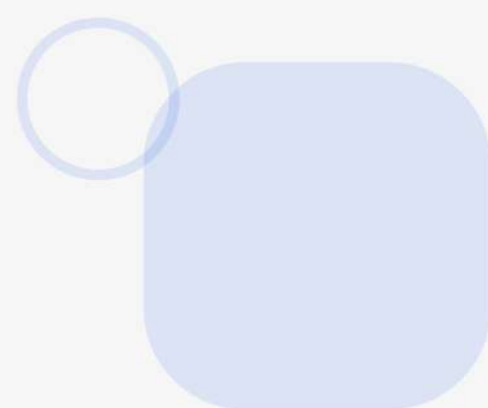

And so, we founded  Scanalytix

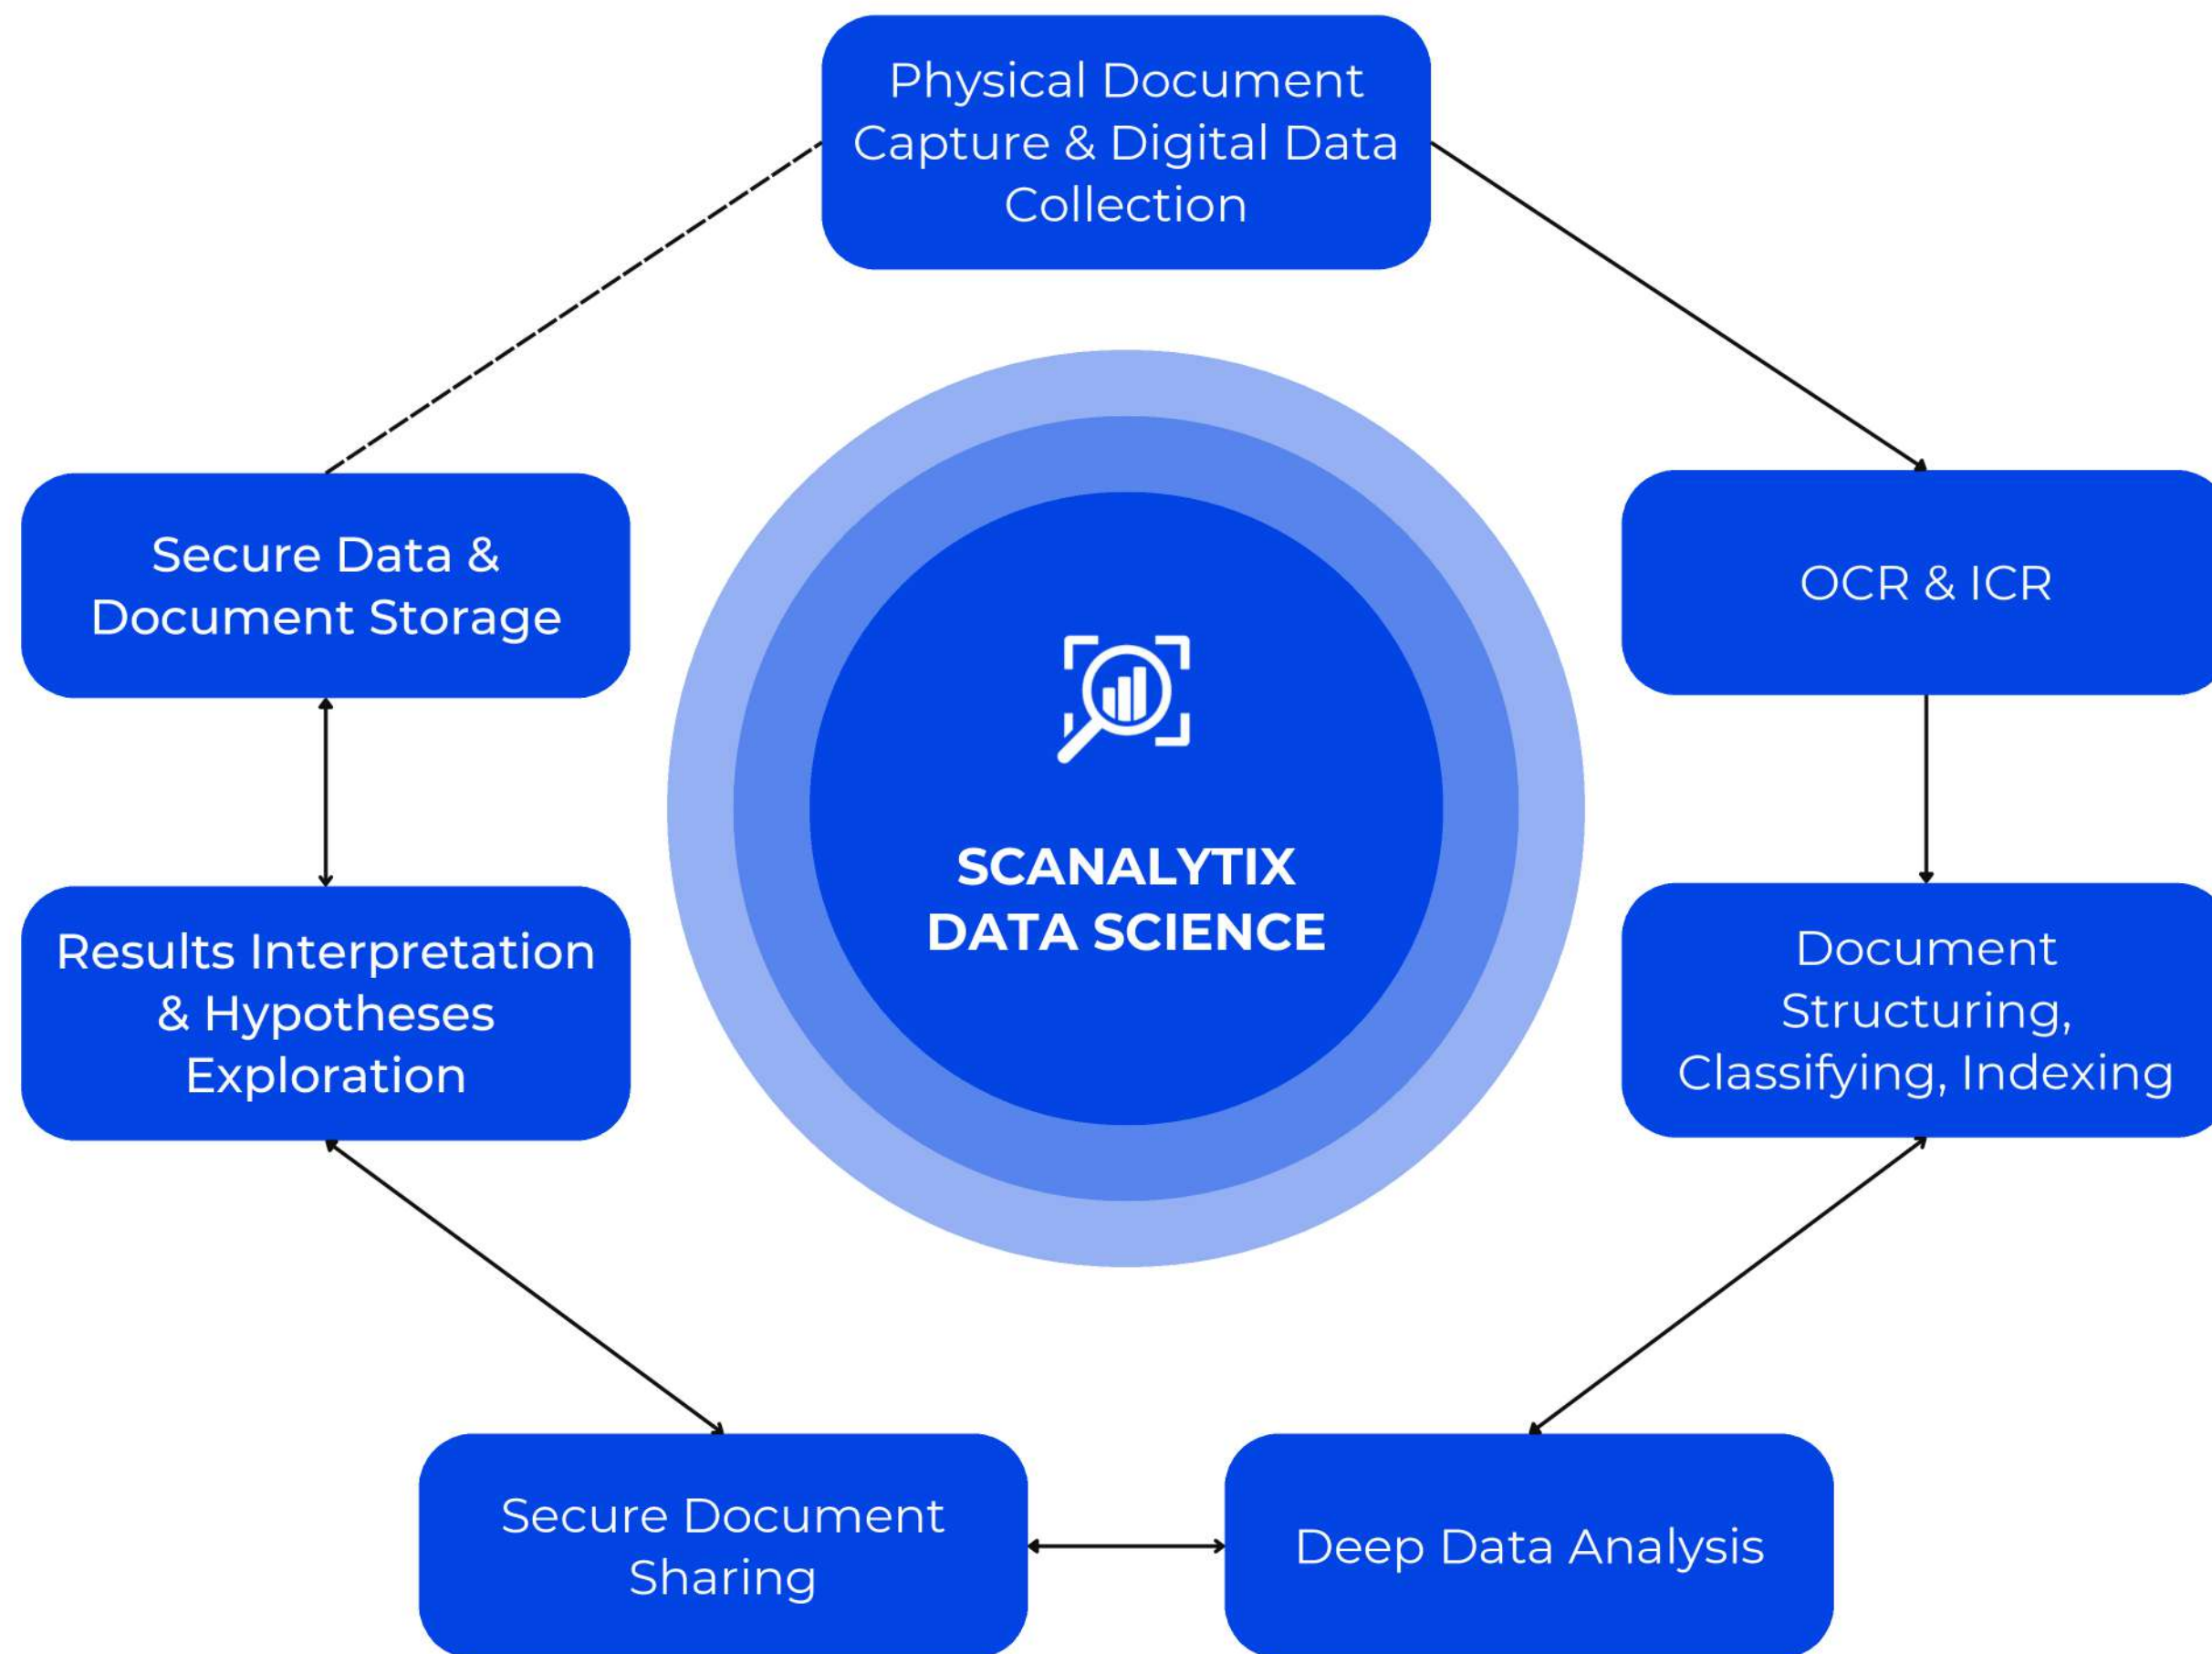

THE SOLUTION

SCANALYTIX means clarity, control, and efficiency in managing large and complex datasets — both digital and physical.

SCANALYTIX eliminates document chaos, reduces risks, and gives legal and administrative teams the freedom to focus on what truly matters: making better-informed decisions, faster, with exceptional results.

REAL BENEFITS:

Smarter, faster document processing

SCANALYTIX automates scanning, indexing, and searching - cutting hours of repetitive admin work down to seconds, so teams can focus on what really matters.

Hundreds of thousands saved annually

Say goodbye to the costs of lost, misplaced, or re-created documents. With SCANALYTIX, legal risks and hidden expenses shrink dramatically, delivering substantial savings.

Decisions made faster and smarter

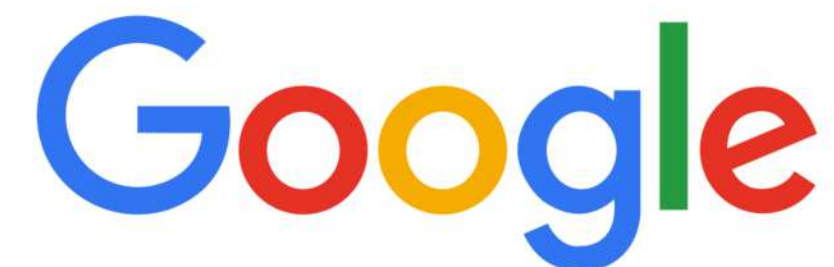

With instant document access and AI-driven predictive insights, legal teams make faster, more reliable decisions - a true competitive edge in a field where every minute matters.

Access all information instantly

From old contracts and emails to case records, SCANALYTIX delivers instant document retrieval with powerful search — even in vast, disorganized libraries.
